Education

University of Texas - Tyler

B.S. in Computer Science

December 2025

Austin Community College

Certificate in Data Science - Python, in progress

May 2026

Experience

Comet Creative Web Agency

Software Engineer Intern (June 2025 - Present)

Worked on reusable templates, lightweight web apps, and small business sites. Contributed to frontend components, layouts, and debugging. Mainly used React + Tailwind; gained experience turning client requirements into features and improving overall site performance and usability.

Independent Work/Study/Contracting

Projects and Freelancing (On-going)

Consistently built full-stack projects through self-directed learning and contracting. This includes:

- A location-based web-scraper ecosystem (React, Postgres, Python) for collecting and managing local business data
- A typing-speed app to race my personal WPM, built with React + Tailwind/JSON recording
- A Java TCP client/server for file transfer and hashing; **and more**

Sedgwick

All-Lines Insurance Adjuster (May 2021 - June 2025)

Managed high-volume workflows with strict deadlines, building strong skills in documentation, communication, and organized execution.

Certifications

Technical Support Fundamentals

Google, Inc.

Relevant Skills

- ★ **Coding skills in React, Python, JavaScript, Java, SQL, and Tailwind CSS;** full-stack development experience; WordPress proficiency; database management
- ★ **IT support and systems expertise:** hardware repair, software configuration, system optimization, and technical troubleshooting; adaptable to new technologies.
