## Education

### University of Texas - Tyler

B.S. in Computer Science, Minor in Mathematics

*December 2025*

### Austin Community College

Certificate in Data Science - Python, in progress

*May 2026*

## Experience

### Comet Creative Web Agency

#### Software Engineer Intern

(June 2025 - Present)

- Built dozens of reusable React components and launched 10+ site templates and small-business web apps
- Designed responsive layouts and custom Tailwind systems to streamline development and maintain visual consistency
- Improved mobile breakpoints, accessibility, SEO, and Lighthouse scores across multiple client projects
- Transformed client requirements into functional, polished features delivered on tight timelines

### Independent Work/Study/Contracting

#### Projects and Freelancing

(On-going)

Consistently building full-stack projects through self-directed learning and contracting. This includes:

- **A location-based web-scraper ecosystem** (React, Node/Express, Postgres, Python) featuring CRUD dashboards, automated web scraping pipelines, and AI-assisted data extraction
- **An interactive typing-speed app to race my personal WPM**, built with React + Tailwind and using a custom made keystroke to JSON ghost tool
- **A Java TCP client/server** for file transferring and hash verification
- **And more**, able to be seen on my personal portfolio site.

### Sedgwick

#### All-Lines Insurance Adjuster

(May 2021 - June 2025)

- Managed hundreds of claims end-to-end with strict accuracy and documentation standards
- Coordinated high-volume workflows under tight deadlines while communicating with homeowners and carriers

## Certifications

### Technical Support Fundamentals

Google, Inc.

## Relevant Skills

**Skill Summary:** React, JavaScript/TypeScript, Node.js, Express, Python, PostgreSQL, HTML/CSS, Tailwind, REST APIs, Git, Vercel. Or more specifically:

- ★ **Languages & Frameworks:** JavaScript/TypeScript, React.js, Node.js, Python, Java, HTML5 and CSS3, Tailwind CSS
