Education

University of Texas - Tyler   *December 2025*
> B.S. in Computer Science, Minor in Mathematics

Austin Community College   *May 2026*
> Certificate in Data Science - Python, in progress

Experience

Comet Creative Web Agency
Software Engineer Intern
(June 2025 - Present)

Built dozens of reusable React components and delivered over 10 site templates and small-business web apps. Designed responsive layouts, implemented custom Tailwind design systems, improved mobile breakpoints, Lighthouse scores, and turned client requirements into functional features and sites.

Independent Work/Study/Contracting
Projects and Freelancing
(On-going)

Consistently build full-stack projects through self-directed learning and contracting. This includes:

- ★ **A location-based web-scraper ecosystem** (React, Node/Express, Postgres, Python) featuring CRUD dashboards, automated web scraping pipelines, and AI-assisted data extraction
- ★ **An interactive typing-speed app to race my personal WPM**, built with React + Tailwind and using a custom made keystroke to JSON ghost tool
- ★ **A Java TCP client/server** for file transferring and hash verification
- ★ **And more,** able to be seen on my personal portfolio site.

Sedgwick
All-Lines Insurance Adjuster
(May 2021 - June 2025)

Oversaw hundreds of claims from start to finish; managed high-volume workflows with strict deadlines, building strong skills in documentation, communication, and organized execution.

Certifications

Technical Support Fundamentals
Google, Inc.

Relevant Skills

Skill Summary: React, JavaScript/TypeScript, Node.js, Express, Python, PostgreSQL, HTML/CSS, Tailwind, REST APIs, Git, Vercel. Or more specifically:

- ★ **Languages & Frameworks:** JavaScript/TypeScript, React.js, Node.js, Python, Java, HTML5/CSS3, Tailwind CSS
- ★ **Backend & APIs:** Express.js, REST API design, PostgreSQL, SQL, authentication/session management
- ★ **Tools & Deployment:** Git/GitHub, Vercel, Railway, npm, Linux/command line, WordPress
- ★ **Practices:** Responsive design, component-driven development, performance optimization, debugging, web scraping (BS4/Selenium), AI Data extraction, JSON data structure, WordPress customization, full system architecture
